Good day dear woman and man reader!

Dear readers, it is with great pleasure I bring Anne Drolet back to complete the follow-up explanation about this famous 'iwater' or intelligent water that was discovered by Dr. Igor Smirnov.

Pauline : Dear Anne, we again have the pleasure to be together for this Newsletter of November and to continue our promise to inform our readers regarding this new technology that will interest more than one, specially those who have their health at heart.

Anne : Yes Pauline, I am happy to be back in your Newsletter. And simply to refresh our readers, it was Dr. Smirnov, a Russian researcher who got called to understand why certain people from Tchernobil's explosion came out with much better results regarding their health than all others, who also discovered they did so because of the quality of the water they drank.

Through Nuclear Magnetic Resonance Tests and Infrared Spectroscopy, Dr. Smirnov discovered the water's healing secrets, an unusual configuration and high-energy activity of water molecules.

Following that amazing discovery, Dr. Smirnov focused his efforts on a technology that could replicate this amazing natural process. The result - MRET®, a proprietary, patented noise field technology that closely resembles the natural geomagnetic field found near healing water springs, which effectively activates and structures water molecules. And now, BIOPRO Technology is delivering all the secrets of this advanced technology to you!

From my side, I have been witnessing the many health benefits of this

'iwater'. This water results from a physical process which imprints a vital subtle energy signature into the water. It is even said about this water that it will become part of the future space journeys.

Experiences have demonstrated surprising effects on global health and on skin problems and dehydration, on top of having a rejuvenating effect, etc.

It has been noticed that 'iwater':

- Helps hydrate cells three times faster than ordinary water
- Assists improvements in cellular function
- Aids absorption deeply into veins and capillaries
- Helps improve circulatory system
- Promotes powerful antioxidant effects
- Supports vital cell communication
- Aids in promoting healthy intestinal flora
- Supports acceleration of nutrient and vitamin availability
- Strong bactericidal effect and enhances immune response
- Anti-bacterial and anti-fungus activity while benefiting the immune response.

Pauline: Wow Anne, you are giving us a lot of surprises.

Anne: Yes, I am well aware of that. And this iWater™ balances the pH of water by reducing the alkalinity or acidity, depending on the source of water.

This water is used to drink or for any other household task, be it to wash vegetable, or to cook or for our personal hygiene. In that activating container, you can as well put water, milk, fruit juices or any other liquid, as well as wine, coffee or tea. Furthermore, we have a portable 'intelligent card' you can put your beverage on so it can also become activated.

Pauline: You told me about health benefits you witnessed personally. Tell us more?

Anne: For quite a while now, I have been collecting testimonials that I find very impressive. People re-hydrate easily, they regain an energy very rapidly, aging spots disappear, psoriasis and eczema reduce by 60% Also, women who had children will be very happy to learn they will no longer have to emergently go to the washroom or better, will get rid of their stress incontinence they face so often and know so well.

Another fabulous experience comes from my associate who sprayed 'iwater'

and regularly put some wet compresses on her father's skin who had been diagnosed with a carcinoma the size of a 2 dollar coin. This simple process made it so that his carcinoma reduced to the size of a green pea whereas the doctor found it no more necessary to do a skin graft. The latter simply scraped the skin and all was alright. My associate saved her old father from undergoing the stress of such a surgery.

Pauline : Wow, what a beautiful result that was. You really tickle my desire to get such activator.

Anne : I will be happy to help you get there when you are ready.

Pauline: You were sharing that this discovery is supported by international researchers?

Anne: Yes, here is the list of Centers and Universities that have done their research and I am convinced the list will soon enlarge gradually.

- Cedar-Sinai Medical Center
- Cal State University
- Engene Biotech, Inc.
- Nu Mega Resonance Lab
- USACAI Environmental Lab
- Geomagnetic & Environment Lab
- Kiev State University
- Kiev Institute of Experimental Pathology, Oncology and Radiobiology
- Moscow State University
- National University of Singapore

Also Pauline, rare are those who do not know the importance of drinking water. We are made of 75% water. Each day, we lose 2,5 liters of water through body functions.

Even a light dehydration slows our metabolism and creates an energy loss. Our whole biology is influenced, from within up to our skin. Our brain cannot live without water. Depression, fatigue, a bad blood circulation and an array of organs are affected when we become dehydrated. And finally, with 'iwater', three glasses of water are sufficient each day to properly hydrate ourselves.

Pauline: Why is 'iwater' so different?

Anne: Contrary to other types of water, it results from is a physical process rather than a chemical process.

Its proprieties have the ability to increase the efficiency of vital intercellular

communication, an important aspect to allow the body to resist and self-repair the damage caused by electro pollution exposure. Effectively hydrating the pathways between cells is an essential aspect of maintaining our health.

Pauline: We read from diversified researches that our cells have a so called 'cellular memory'. What does happen with this water?

Anne: Yes, this water reestablishes proper intercellular communication. This function enhances repairing the damages caused by electrical exposition and all this electromagnetic pollution we talked about last August. It is why people begin feeling the benefits 24 hours soon after having started drinking 'iwater'.

Pauline: I presume our readers will wish to contact you. Here is your phone number.

Anne : To reach me: 514-912-8597.

Pauline : Anne, I thank you warmly for this interview and I wish ourselves to end our lives fully healthy for it is yet the best thing to do.

Anne : Certainly. Also, here are some very good documents to listen to and share with others to help them understand what electromagnetic pollution is. Some come from France, Belgium and also from BioPro.

So, until we meet soon, be well !

NEXT MONTH: A new case: a healed PMS that had lasted 30 years.

I WISH YOU A WONDERFUL MONTH filled with sunny thoughts and warmth in all areas of your life.

Warmly:
